

MARYLAND BRAIN, SPINE + PAIN

Specialists in peace of mind and relief of pain

To our valued patients,

We understand that many people are anxious about the spread of COVID-19 in our community and across the globe, and also recognize the important need to protect our patients, their families and our staff. Therefore, in accordance with recommendations from the CDC and Governor Hogan's office, MBSP will be closed from 3/18/20 through 4/10/20 with a tentative plan to reopen on 4/13/20, although this date may change depending on circumstances at that time.

However, in order to provide some continuity of care, a limited number of staff will be available in the office Monday-Friday from 9-12. We will ONLY address post-operative care and urgent prescriptions needs for existing patients. At this time, we will be unable to evaluate other needs and encourage you to consult with your primary care provider or report to your nearest Emergency Department if you have cough, fever or shortness of breath.

We appreciate your understanding during this difficult time and will notify you with updates as we become aware of changes in patient care policy and recommendations.

Sincerely

Maryland Brain Spine + Pain
